

AIRBUS SE -- Rapport Annuel / Annual Report 2025

Leiden, Pays-Bas | Toulouse, France | Hamburg, Deutschland

Airbus est un leader mondial de l'aeronautique, de l'espace et des services associés. En 2025, le chiffre d'affaires consolidé s'élève à 75,1 milliards d'euros, soit une hausse de 6 % par rapport à l'exercice précédent. Le groupe emploie environ 134 000 collaborateurs à travers le monde, répartis sur plus de 180 sites dans 35 pays. Les investissements en Recherche & Développement atteignent 3,4 milliards d'euros, renforçant la position d'Airbus dans les technologies de pointe, y compris l'hydrogène, l'électrification et la fabrication additive.

Airbus is a global leader in aeronautics, space and related services. In 2025 consolidated revenue reached EUR 75.1 billion, up 6% year-on-year. The Group employs approximately 134,000 people worldwide across 180+ sites in 35 countries. R&D investments totalled EUR 3.4 billion, strengthening Airbus's position in cutting-edge technologies including hydrogen propulsion, electrification and additive manufacturing. The company announced plans to hire 13,000 engineers in 2026 to support ramp-up activities.

Key Financial Highlights / Chiffres-cles

Metric / Indicateur	FY 2025	FY 2024	Delta
Revenue / Chiffre d'affaires	EUR 75.1B	EUR 70.8B	+6.1%
EBIT Adjusted / EBIT Ajuste	EUR 7.9B	EUR 7.2B	+9.7%
Net Income / Resultat Net	EUR 4.2B	EUR 3.8B	+10.5%
R&D Expenditure	EUR 3.4B	EUR 3.1B	+9.7%
Employees / Effectifs	134,000	130,600	+2.6%
Order Backlog / Carnet commandes	8,749 aircraft	8,598 aircraft	+1.8%
Free Cash Flow	EUR 4.5B	EUR 3.6B	+25%

Programmes & Technologies

A321XLR : First delivery scheduled Q3 2025 to Aer Lingus. Range 4,700 nm, single-aisle efficiency benchmark. EASA Type Certificate obtained March 2025. Certification achieved under CS-25 Amdt 27 with full DO-178C (DAL-A) avionics SW compliance. Wing manufactured in Broughton (UK), FAL in Hamburg and Toulouse.

A350F (Freighter) : Programme launch confirmed, 2027 EIS target. Digital twin developed in CATIA V6 / 3DEXPERIENCE platform (Dassault Systemes). PLM backbone: Teamcenter (Siemens) for legacy data, migration ongoing to 3DX. Structural analysis performed with NASTRAN and in-house FEM tools.

ZEROe Hydrogen Demonstrator : Ground tests completed at Nantes facility. Cryogenic tank supplied by Liebherr-Aerospace. Euro 7 automotive emission standards referenced for ground support equipment compatibility. Target: first hydrogen-powered commercial aircraft by 2035.

Hiring Plan 2026 : 13,000 new engineering positions across all divisions. Focus areas: aerostructures (Nantes, Saint-Nazaire), avionics (Toulouse, Elancourt), digital/PLM (Bangalore, Getafe), flight physics (Bremen, Filton). Graduate programme expanded, partnerships with ISAE-SUPAERO, TU Munich, Cranfield.

Compliance, Governance & Sustainability

EASA (European Union Aviation Safety Agency) oversight governs all Airbus civil aircraft programmes. Military programmes fall under OCCAR (Organisation for Joint Armament Cooperation) framework. Avionics software developed to DO-178C standards, hardware to DO-254.

Cybersecurity: NIS2 Directive compliance roadmap initiated across all EU entities. ISO 27001 certification maintained for Airbus CyberSecurity division (Elancourt, FR). SOC-2 Type II for Airbus Skywise cloud platform.

ESG Ratings (2025): MSCI AA, Sustainalytics 18.2 (Low Risk), CDP Climate A-. Science-Based Targets initiative (SBTi) approved 1.5 deg C pathway. Scope 1+2 emissions down 14% vs 2023 baseline.

Governance: Board of Directors 12 members, 42% female representation. CEO: Guillaume Faury (since April 2019). CFO: Thomas Toefer (since 2023). Registered office: Leiden, NL. Operational HQ: Toulouse, FR.
