

VIVATECH 2025 — CONFERENCE NOTES

Paris Expo Porte de Versailles | 11-14 June 2025
Notes prises par / Notes taken by: J. Martin, Strategy Dept.

DASSAULT SYSTEMES

Headquarters: Velizy-Villacoublay (78), France
Employees: ~23,000 worldwide
Revenue 2024: EUR 6.0B
Key Platform: 3DEXPERIENCE (cloud + on-premise)
CEO: Pascal Daloz (since Jan 2024)

Presentation highlights:

- 3DEXPERIENCE platform adoption growing 22% YoY in aerospace/defense
- Partnership with Airbus on digital twin for A350F programme
- CATIA V6 + SIMULIA used for virtual certification workflows
- New "Industrial Metaverse" offering demoed on stage
 - combines CATIA, DELMIA, ENOVIA in unified VR environment
 - early adopter: Safran (landing gear digital twin)
- Acquisition of Medidata (life sciences) now fully integrated
- Cloud revenue now 35% of total (up from 28% in 2023)

>>> SCHNEIDER ELECTRIC <<<

[KEYNOTE — HALL 1, STAGE A, 12 JUNE 14:00]

HQ: Rueil-Malmaison (officially), major R&D center in Grenoble
Employees: 128,000+
Revenue 2024: EUR 36.4B
Focus: energy management, industrial automation, IoT
CEO: Peter Herweck

- * EcoStruxure platform — IoT-enabled energy monitoring
- * Announced "Schneider Electric AI Hub" in Grenoble — 200 data scientists
- * Major push on sustainability: aiming carbon-neutral operations by 2030
- * Partnership with Microsoft Azure for edge computing in factories
- * New offer: "Electricity 4.0" — electrification + digitization convergence
- * Mentioned Euro 7 readiness for EV charging infrastructure

VALEO

Headquarters: Paris (75), France
Employees: ~103,000
Revenue 2024: EUR 22B
Key area: Automotive supplier — ADAS, electrification, lighting
CEO: Christophe Perillat

Conference booth + presentation notes:

- Valeo is the #1 patent filer in France (1,799 patents in 2024)
- ADAS / autonomous driving: LiDAR (SCALA 3), cameras, radar fusion
- Demonstrated Level 3 autonomous driving system (highway pilot)
- Electric powertrain: 48V mild-hybrid systems, 800V inverters

[VALEO continued from previous page]

- Thermal management for EVs — heat pump systems gaining traction
- Software-defined vehicle: partnership with Qualcomm on SoC integration
- Valeo.ai research lab: 300+ ML engineers, published at CVPR/NeurIPS
- Hiring: 1,500+ R&D positions open globally, focus on SW engineers
- Competition: Continental, Bosch, ZF — but Valeo claims ADAS market lead in EU
- INTERESTING: mentioned exploring defense-adjacent applications (optronics for armored vehicles)

OVHcloud

(smaller company — booth visit only, no main stage)

HQ: Roubaix (59), France

Employees: ~2,800 (SMALL compared to hyperscalers)

Revenue 2024: EUR 0.9B

Focus: European sovereign cloud, dedicated servers, public cloud

CEO: Michel Paulin

Notes:

- * Positioning heavily on "European sovereignty" narrative
- * SecNumCloud qualification obtained (ANSSI)
- * New GPU cloud offer (NVIDIA H100) for AI workloads
- * Competing w/ AWS, Azure, GCP — but 10x smaller
- * Interesting for companies needing GDPR-compliant hosting
- * Water-cooling tech in Roubaix DC — PUE < 1.2
- * NIS2 compliance already achieved

*** COMPETITOR ALERT — CAPGEMINI ENGINEERING ***

Capgemini Engineering (formerly Altran) had a MASSIVE booth.

Key observations:

- >> 55,000 engineers globally (they claim largest pure-play engineering firm)
- >> Revenue: part of Capgemini Group (EUR 22.5B total), engineering ~EUR 7B
- >> Pushing "Intelligent Industry" — convergence of IT + OT + engineering
- >> Aerospace clients: Airbus, Safran, Thales, Dassault Aviation
- >> Auto clients: Stellantis, Renault, BMW, VW
- >> Actively recruiting: 8,000 positions in France alone
- >> Mentioned partnership with Naval Group on submarine simulation
- >> THIS IS A DIRECT COMPETITOR — monitor closely

SUMMARY / KEY TAKEAWAYS

1. Dassault Systemes 3DEXPERIENCE is becoming de-facto standard in aero PLM
2. Schneider Electric IoT play is massive — 128k employees, EUR 36B+
3. Valeo very aggressive on ADAS, 103k employees, EUR 22B — watch defense pivot
4. OVHcloud SMALL (2.8k employees, <1B EUR) but interesting sovereign cloud angle
5. Capgemini Engineering is the 800-lb gorilla in engineering services — THREAT

NEXT STEPS:

- Schedule follow-up meetings with Dassault Systemes (PLM eval)
- Get OVHcloud pricing for SecNumCloud hosting
- Analyze Capgemini Engineering service overlap with our offering
- Review Valeo ADAS patents (freedom-to-operate check)
